

XENON BRICK LIGHT

NSL presents the newest addition to its Xenon product group –

Xenon Brick Light

Xenon Brick Light (XBL) utilizes the same 18 watt xenon lamp technology as our highly successful Xenon Task Light (XTL), Xenon Mini Light (XML) and the Xenon Step Light (XSL).

The Xenon Brick Light has been uniquely designed to the specific size of a standard brick. This provides the perfect solution for those applications where a morelinear fixture is required.

Both the cover and the can of the Xenon Brick Light are constructed of die cast aluminum for corrosion protection and strength. The XBL is suitable for both interior and exterior applications and comes complete with a 12 volt transformer and housing for easy installation.

There are three decorative covers to choose from: Louver, Prism or Scoop. Each cover is available in white, black, aluminum or bronze.

Xenon Brick Light by NSL provides a safe, attractive and affordable way to light steps, aisles, paths, and entrance ways.

Fits any standard brick void

Xenon Bulb

- Burns significantly cooler than halogen
- Brighter than fluorescent
- Four times the lamp life, at half the replacement cost of 120 V halogen
- No harmful UV rays
- Safe low pressure bulbs

Diecast aluminum cover and can
Corrosion resistant, suitable for concrete pour

Push-in 120 V connectors (no wire nuts required)

Room for easy 120 V thru-wiring

Numerous 1/2" screw in fittings providing water resistant seal for wire connection
